2. Separate Contracts.—The basic rate applies to work let under a single contract. For any portions of the work let under separate contracts, on account of extra service thereby required, the rate shall be four per cent greater, and if substantially all the work is so let the higher rate shall apply to the entire work; but there shall be no such increase on the plumbing, heating, electrical and other mechanical work or on contracts in connection with which the Owner reimburses special consultants' fees to the Architect, or for articles not designed by the Architect but pur-

4. Extra Services and Special Cases.—If the Architect is caused extra drafting or other expense due to changes ordered by the Owner, or due to the delinquency or insolvency of the Owner or Contractor, or as a result of damage by fire, he shall be equitably paid for such extra expense and the service involved.

Work let on any cost-plus basis shall be the subject of a special charge in accord with the special service required.

If any work designed or specified by the Architect is abandoned or suspended, in whole or in part, the Architect is to be paid for the service rendered on account of it.

5. Payments.—Payments to the Architect on account of his fee shall be made as follows, subject to the provisions of Art. 4:

Upon completion of the preliminary studies, a sum equal to 25% of the basic rate computed upon a reasonable estimated cost.

During the period of preparation of specifications and general working drawings (exclusive of details) monthly payments aggregating at the completion thereof a sum sufficient to increase payments to 75% of the rate or rates of commission arising from this agreement, computed upon a reasonable cost estimated on such completed specifications and drawings, or if bids have been received, then computed upon the lowest bona fide bid or bids.

From time to time during the execution of work and in proportion to the amount of service rendered by the Architect, payments shall be made until the aggregate of all payments made on account of the fee under this Article, but not including any covered by the provisions of Article 4, shall be a sum equal to the rate or rates of commission arising from this agreement, computed upon the final cost of the work.

Payments to the Architect, other than those on his fee, fall due from time to time as his work is done or as costs are incurred.

No deductions shall be made from the Architect's fee on account of penalty, liquidated damages, or other sums withheld from payments to contractors.

6. Survey, Borings and Tests.—The Owner shall, so far as the work under this agreement may require, furnish the Architect with the following information: A complete and accurate survey of the building site, giving the grades and lines of streets, pavements, and adjoining properties; the rights, restrictions, easements, boundaries, and contours of the building site, and full information as to sewer, water, gas and electrical service. The Owner is to pay for borings or test pits and for chemical, mechanical, or other tests when required.

7. Supervision of the Work.—The Architect will endeavor to guard the Owner against defects and deficiencies in the work of contractors, but he does not guarantee the performance of their contracts. The supervision of an Architect is to be distinguished from the continuous personal superintendence to be obtained by the employment of a clerk-of-the-works.

When authorized by the Owner, a clerk-of-the-works acceptable to both Owner and Architect shall be engaged by the Architect at a salary satisfactory to the Owner and paid by the Owner, upon presentation of the Architect's monthly statements.

8. Preliminary Estimates.—When requested to do so the Architect will furnish preliminary estimates on the cost of the work, but he does not guarantee the accuracy of such estimates.

9. Definition of the Cost of the Work.—The cost of the work, as herein referred to, means the cost to the Owner, but such cost shall not include any Architect's or Engineers' or Special Consultants' fees or reimbursements or the cost of a clerk-of-the-works.

When labor or material is furnished by the Owner below its market cost the cost of the work shall be computed upon such market cost.

10. Ownership of Documents.—Drawings and specifications as instruments of service are the property of the Architect whether the work for which they are made be executed or not, and are not to be used on other work except by agreement with the Architect.

11. Successors and Assignments.—The Owner and the Architect, each binds himself, his partners, successors, executors, administrators, and assigns to the other party to this agreement, and to the partners, successors, executors, administrators and assigns of such other party in respect of all covenants of this agreement.

Except as above, neither the Owner nor the Architect shall assign, sublet or transfer his interest in this agreement without the written consent of the other.

12. Arbitration.—All questions in dispute under this agreement shall be submitted to arbitration at the choice of either party.

Form A—102

The Owner and the Architect hereby agree to the full performance of the covenants contained herein.

IN WITNESS WHEREOF they have executed this agreement, the day and year first above written.

YOLO COUNTY EMPLOYEE'S ASSOCIATION RECOMMENDATIONS ON COFFEE BREAKS

Dr. Bauer, President of the Yolo County Employee's Association, presented recommendations of the Association in regard to the coffee breaks, as follows:

"Coffee breaks have long been considered a good morale booster for employees and have become firmly established in most governmental and non-governmental agencies. The Yolo County Employees Association strongly urges confirmation of this institution for all county employees who wish to take advantage of this opportunity.

However, in the interest of efficiency as well as good taste, members of the Yolo County Employees Association have accepted the following recommendations which were adopted by our Board of Directors and voted on by our membership in our regular meeting on Monday, December 5, 1955:

1. Coffee breaks may be used in conjunction with staff meetings; some of the most important administrative decisions have been reached over a cup of coffee.

2. While it is difficult to set exact time limits, about 15 minutes should be considered adequate.

3. To provide continuous service to the public, employees will take their coffee breaks in shifts.

4. Coffee gatherings should not be held near the reception desk, but where space permits, in more remote areas of the respective departments."

The Board acknowledged the Recommendations and decided to take no action.

Article I. This agreement is made in the light of the following facts and circumstances:

1. Under the provisions of the Federal-Aid Highway Acts certain funds are authorized to be appropriated for expenditure on a system of principal secondary roads to be selected by the State highway departments in cooperation with the county supervisors and the Commissioner of Public Roads. The route upon which the subject project is proposed has been so selected and approved by the Commissioner of Public Roads for inclusion in the Federal-Aid Secondary Road System. Federal-Aid Highway funds are now available for obligation to the subject project.

2. The Department is required to enter into an agreement with the Commissioner of Public Roads relative to the prosecution of this project and the obligation of participating Federal-Aid funds.

THEREFORE, in consideration of the premises herein contained, the parties agree as follows:

Article II. Cooperation with the United States.

MAINTENANCE

1. The Federal-Aid Acts require that the maintenance of projects constructed thereunder shall be the responsibility of the State and that a project for which the Department proposes to provide maintenance by an agreement with the County shall not be approved if any project previously improved with Federal funds under the provisions of the Federal Highway Acts, as amended and supplemented, which the County has agreed to maintain, is not being satisfactorily maintained as determined by the Commissioner.

It is therefore agreed that after completion of said project or usable portions thereof, and upon notice of such completion, the County will maintain the completed works in a manner satisfactory to the authorized agents of the United States.

Article III. Control of Work.

RIGHT OF WAY

The furnishing of rights of way as provided for herein includes, in addition to all real property required for the improvement free and clear of obstructions and encumbrances, the payment of damages to real property not actually taken but injuriously affected by the proposed improvement.

1. Such rights of way as are necessary for the construction of the proposed improvement, will be furnished by the County.

2. It is understood that a contract for the construction of this project or any portion thereof cannot be awarded until the necessary right of way has been made available.

3. The County will furnish to the Department prior to advertising of the project evidence that necessary rights of way are available for construction purposes.

4. The County agrees to pay from county funds any costs, which are incurred in connection with this project, which arise out of right of way litigation or delays to the contractor because right of way has not been made available to him for the orderly prosecution of the work.

ENGINEERING

Preliminary Engineering—The term "preliminary engineering" as used herein includes all preliminary work, including but not restricted to, preliminary surveys and report, laboratory work, soil investigation, preparation of plans, design and advertising.

Construction Engineering—The te m "construction engineering" as used herein includes actual inspection of the work, necessary construction staking, laboratory and field testing, field reports and records, estimates, final report, and allowable expenses of employees engaged therein.

County employees shall perform all engineering work. It is understood that the Department is held responsible by the United States Government for the conduct of the work and for satisfactory results and that the Department may not delegate its responsibility. It is therefore agreed that the Department will exercise general supervision over the work and may take direct control of the subject project at its discretion when it is deemed that the responsibility of the Department requires.

When the cost of Right of Way, Preliminary Engineering or Construction Engineering, incurred by the County is to be borne in part by Federal-Aid funds, the Department will reimburse the County for services performed on the basis of the actual cost thereof to the County including compensation and expense of personnel working on the project, the required materials and the use of county-owned automobiles at the rate of four cents per mile, provided, however, that the County will contribute its general administrative and overhead expense. Payments for such work will be made by the Department upon receipt of bills therefor, prepared in such form and supported by such detail as may be prescribed by the Department. The Department and the Bureau of Public Roads shall be given access to the County's books and records for the purpose of checking costs paid or to be paid by the Department hereunder.

AWARD OF CONTRACT

Actual construction work will be performed by contract. The Department will make the final preparation for advertising, will advertise and award the contract and will make payments to the contractor as the same become due.

Prior to advertising for bids the County and the Department must agree on an engineer's estimate as to the estimated cost of the project. No contract for an amount in excess of said engineer's estimate will be awarded unless sufficient funds are available and both the Department and County agree to such award.

Article IV. Special Covenants.

1. Nonparticipating Items. All costs ruled ineligible under the Federal-Aid Highway Acts but properly chargeable to this project shall be paid by the County.

2. Preliminary Engineering. All preliminary engineering charges, including the cost of advertising, have been or will be paid by the County from funds other than those provided by the Federal-Aid Highway Acts.

3. Construction Engineering. The construction engineering is included in the estimated cost and may be paid from Federal and County funds.

4. Claims. Since this project is not on a State Highway, State Highway funds may not be used to finance any costs including claims submitted by the contractor, Public Utilities, Rights of Way or other pertinent charges.

In the event that such claims are submitted and the Bureau of Public Roads and State Attorneys rule such claims cannot be paid by funds provided by the Federal-Aid Highway Acts the County will upon the demand of the Department, deposit with the State Treasurer, a sum sufficient to cover the cost of any or all claims.

Article V.

In case of conflict between any of the provisions contained in Exhibits A and B, the provisions of Exhibit B shall govern.
